THE SOUND-INSULATING VARIFLEX COMFORTDRIVE PARTITION.

Advanced convenience with fully automatic drive technology.

Quick and easy office and conference room configuration.

The VARIFLEX ComfortDrive is the fully automatic version of the VARIFLEX operable partition which offers even more convenience in flexible space utilisation. At the push of a button it enables interiors to be adapted quickly and efficiently to changing daily requirements, this makes it an ideal solution for offices and con-

ference rooms. With this system, multi-functional space management is made easy.

Advanced technology – the ComfortDrive operating system.

With the VARIFLEX ComfortDrive system, sound-insulating opaque or transparent partition elements can be moved to their individually pre-programmed positions under full automatic control,

and their stabilizing profile seals extended and retracted as part of the same automatic system. The user interface takes the form of an easy-to-operate touch screen.

The benefits at a glance:

- Fully automatic operation at the push of a button
- Exceptional convenience with dynamic opening and closing speeds
- Easy operation with self-explanatory touch screen
- Ideal for both opaque and transparent partitions
- Multiple combinations of possibilities involving several element types and partition systems
- Reliable safety – partition stops on contact with an obstacle; TÜV/GS-tested
- Individually programmable for custom configuration

OPERATION MADE EASY.

The VARIFLEX ComfortDrive touch screen.

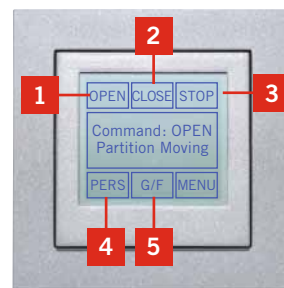

Space management at the push of a button.

The VARIFLEX ComfortDrive can be controlled with just one finger operating a central touch screen. Aside from the standard functions “Open”, “Close” and “Stop”,

a number of special positioning modes such as “One element open” (“Personnel” function), “Gapped configuration” or various free positioning patterns can be individually programmed and selected.

Technical data	Variflex ComfortDrive
Track width:	98 mm
With ceiling mounting joist and quad-skin baffle	154 mm
Max. element height:	9,000 mm
Max. element weight:	500 kg
Max. number of elements:	30
Travel speed:	Dynamic response up to 250 mm/s
Sound insulation in Rw*:	VARIFLEX up to 57 dB

* Laboratory value in accordance with EN 20140

At the push of a button, the VARIFLEX ComfortDrive takes the partition elements straight to their pre-programmed positions.

Personnel opening (optional)

In the “Personnel” opening mode, the partition only partially opens and closes. This ensures efficient personnel access based on a pre-programmable number of moving elements.

Gapped configuration (optional)

In this mode, the elements are positioned with a certain gap between one another.

Free positioning mode (optional)

The “Free positioning” function offers the possibility of placing the elements at any track location. The pattern shown here is just one of many possible configurations.
